Wendy Varish, DC • Course Instructor

Wendy Varish, DC is a graduate of the National College of Chiropractic in Lombard, IL. Since receiving her degree in 1992 she has served on numerous committees for chiropractic related issues and has taught a variety of educational courses, presentations, and workshops concerning chiropractic related topics. Some of these include: nutrition and fitness, spinal care, food and mood, and exercising, stretching and rehabilitation. Dr. Varish is currently in professional practice in Howards Grove, Wisconsin.

CT Delegation • Course Descriptions

Patient History • Thursday, September 15 - 8:00 a.m. - 12:00 p.m.

Chiropractic Technicians who are actively involved in the taking of any patient history, outside the presence of the chiropractor, need this course.

The subjective portion of the S.O.A.P. note format (Subjective, Objective, Assessment and Plan) will be taught. This method is part of a system of organizing the patient record called the “problem oriented record”. The S.O.A.P. format is the most widely used type of documentation in the health care industry.

* Please bring 2 copies of the following office forms:

- Patient Intake Form
- History and/or Exam Form
- Any other forms you may use
- Daily Note Forms
- Update Forms

Preliminary Physical Examinations • Thursday, September 15- 12:30 p.m. - 3:00 p.m.

Chiropractic Technicians need this course if they are at all involved in the preliminary chiropractic examination. This includes the process of determining a patient’s height, weight, temperature, blood pressure, and noting other physical characteristics that do not require the use of instruments or more extensive diagnostic procedures.*

* All attendees of this session should bring a blood pressure cuff and stethoscope to assist in learning.

Physiological Therapeutics Overview • Thursday, September 22 - 8:00 a.m. - 12:30 p.m.

This overview course is required before a chiropractic technicians can take any physiological therapeutic modality course. It is designed for chiropractic technicians who perform any physiological therapeutic modalities in the office. It will cover the history and concepts of chiropractic physiological therapeutics followed by:

- Scope of application
- The healing process
- Indications of pain

The program will also include descriptions of basic elements of various modalities. Where possible, interactive demonstrations will be a part of the course. Chiropractic technicians are only required to take the specific modules for those therapies they plan to perform in the office.

Thermotherapy / Cryotherapy • Thursday, September 22 - 1:00 p.m. - 3:00 p.m.

(Physiological Therapeutics Prerequisite)

- Application
- Types of packs
- Methods & applications
- Comparison of heat & cold
- Indications & contraindications
- Physiological effects.

Mechanical Therapy • Thursday, September 22 - 3:00 p.m. - 5:00 p.m.

(Physiological Therapeutics Prerequisite)
Includes Long Axis & Intersegmental traction

- Types
- Physiological effects
- Principles
- Indications & contraindications

Electrotherapy • Thursday, September 29 - 8:00 a.m. - 10:15 a.m.

(Physiological Therapeutics Prerequisite)

- Physiological basis
- Classification
- Interference
- Therapy parameters
- Electrode placement
- Indications & contraindications

Ultrasound Therapy • Thursday, September 29- 10:15 a.m. - 12:15 p.m.

(Physiological Therapeutics Prerequisite)

- Physics
- Physiological effects
- Application
- Dosage & time
- Indications & contraindications

Cold Laser & Light Therapy • Thursday, September 29 - 12:45 p.m. - 3:45 p.m.

This is a stand alone class that teaches the principles and procedures of light therapy including cold laser and infrared. This class has a hands-on presentation.
